QPILtd. Beverage Industry Displays and Promotional Materials
Illuminated Displays

QPILtd offers a wide range of Product Display, Point of Sale, Promotional Products, Premiums, Giveaways, and many other product categories, factory direct to your warehouse. Email qpi@qpiltd.com for a quote request on any of your procurement needs.

QPILtd, the easiest way for your product to look good to your consumers.

EL / eInk

This technology brings a flat, printed display to life, highlighting your key message while making it eye catching with movement of light.

QPILtd has two distinct products in this category, both use a thin, flexible, durable film with electronics built into a layered sandwiched less than 1mm thick.

They can be wrapped around curved shapes, mounted onto backing boards, frames, or directly onto most surfaces.

**EL (Electroluminescent Displays)**

Where illumination is needed, Electroluminescent film outperforms a light box display with programmable highlights and movement, as well as soft, completely consistent saturation lighting across the whole display.

**eInk / ePaper Displays**

Run for months or years on a tiny battery pack, that can be built into most displays.

eInk / ePaper works well in most in store POS environments with good, consistent ambient light.

Indoor and Outdoor Signs

As well as regular acrylic indoor or outdoor displays and signs we can use innovative materials such as “Black – White”, Electroluminescent sheet and many other options, to give your branding some extra distinction.

**Illuminated Displays**

Various shapes and sizes of illuminated outdoor signage.

Add character and charm to your branding with wood, metal and other materials in conjunction with lighting, acrylic or other features.

QPI makes procurement simple and streamlined, with outstanding results from minimal input.
**Acrylic Displays**

QPI Ltd's wide variety of manufacturing techniques and disciplines gives you the versatility to include almost any element or feature you need to make your brand and campaign look outstanding.

**Bottle Glorifiers**

**Levitating Displays**

Give your product a magic, eye catching feel with a levitating display. The product floats in the display, either supported on a platform or suspended.

The rotation can be programmed for full constant rotation, swinging back and forth, or any combination.

**ALSO AVAILABLE!**

Caps with our without bottle openers, USB Drives and many other promotional items.
